

Hi everyone, I am so glad to write for my love previous University. I got a good education in theory and practicals. I learnt how to work in the laboratory. There are very good teachers at the biology faculty Mr Mustafa dozen, Kemal Buyukguzel, Khadija miss, Ayesha miss. I can't thank them for being hardworking what they did with us. It was nice to have a biologist day celebration to show our invention and creative idea and get more experience for presentations. We work outdoor with our teachers like a field plant and mushrooms fields and give a demo class to lower schools students. I want to thank all my teachers. I am a teacher now because of you. I learnt a lot from you
Best regards

Mr.OTMANE CHARMOUKA

Deputy head at international hope school

Biology teachers at international how school & South point school .Master & assistant research students
